# The curriculum

## An introductory note

Throughout the curriculum and our training courses, we use the term ‘publishing’ in its broadest sense to include the production by any means of written material produced by any individual person, group or organisation for ‘public’ consumption.

We all work in publishing, but we do not all work for a traditional publishing company or within a dedicated publishing team. Anyone who produces written or electronic material for others to use for whatever purpose is still publishing. Our skills and processes are adapted to the particular needs of our client, whether that be a traditional publishing company or any other organisation or individual that produces material in print or online.

This curriculum has been developed to outline the range of skills and knowledge that editors and proofreaders use in their professional life. Not all editors/proofreaders will use all the skills and knowledge included here in their day-to-day work. However, awareness of other processes and skills outside this narrow focus, an in-depth knowledge of the profession in general, and acquisition of a broad range of skills are all essential for the continuing professional development of all members.

### *Employment status*

Some CIEP members will not be working as freelancers so there will be some aspects of subdomain 1.2 (business management and practice) that may not be immediately relevant to these members. The knowledge in this subdomain will, however, be useful to most members working in the profession.

## Domains

The curriculum is divided into three domains:

1. Working as a professional
2. Editorial knowledge and practice
3. Specialist skills and knowledge.

**Domain 1** covers the professional life of an editor/proofreader. **Domain 2** covers the core knowledge and skills that editors/proofreaders use in their practice. **Domain 3** details the additional elements that editors/proofreaders need in specialist areas of work. It details some of the aspects of the work relating to some specialist fields. The list is not exhaustive and will be added to in future editions.

Each domain is divided into subdomains, and each of these includes specific topics.

Each topic includes information on:

- **Knowledge criteria:** what you need to know.
- **Editorial competencies, professional skills and attitudes:** how you perform tasks and how you demonstrate your awareness.
- **Resources to support learning/CPD:** resources and courses to help you develop these competencies.

We will add details of the ways that you can demonstrate competency (evidence/assessment) in future versions of this document.

### *Specialist skills and knowledge*

Some specialisms are listed in the curriculum. The list is not intended to be definitive; if you work in a particular specialism and you could contribute details for a section, please use the template on page 28 and send your draft to the training director (training@ciep.uk) for consideration.

Some areas of work that could be added include: social sciences and humanities, educational publishing.

## **Resources to support learning/CPD**

In this column, we have listed some useful training courses, online resources and some hard-copy texts. It is not possible to include in this document all the resources that you might use to help you to develop.

Please do also refer to the additional resources on the CIEP website:

- **CIEP Code of Practice**
- **CIEP Resources**

We have listed CIEP guides, factsheets and position papers where they are relevant but please check the CIEP website for any further resources as they become available.

We have not listed the basic editorial texts that are included in the CIEP's list of **Recommended reference books and resources**, as you are likely to be familiar with them.

You might also like to look at the **Publishing Training Centre** website, where you will find a wide variety of courses in all aspects of publishing.

### *Style guides*

We have not listed published style guides, except where they are of particular relevance, but we recommend that you familiarise yourself with the most common guides. Many publishers and other organisations have their own style guides, which are also worth exploring.

Some commonly used style guides include:

- *Chicago Manual of Style*
- American Psychological Association *Publication Manual of the American Psychological Association*
- American Medical Association. *AMA Manual of Style: A guide for authors and editors*
- *The Economist Style Guide*
- University of Cambridge *Editorial style guide*
- Associated Press *The Associated Press Stylebook*
- Modern Humanities Research Association *MHRA Style Guide*

Do check that you are using the most recent edition of any published style guide.

## Curriculum feedback and development

The curriculum has been developed by practising editors. We will continually review the content in response to gradual changes in practice, so we greatly appreciate your feedback. Please email the training director ([training@ciep.uk](mailto:training@ciep.uk)) with your comments and suggestions.
